

Conflicts Tool

The Conflicts Tool manages the tracking of conflicts of interest within your organisation. The Tool allows you to ask questions, and create a record information about conflicts. It also provides a structured procedure for handling issues from approval and tracking, through to resolution.

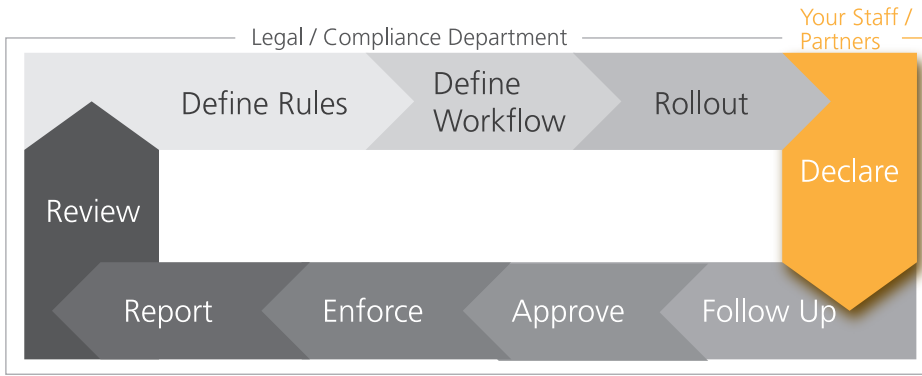

Does it sound like your company?

- | You currently ask your employees about conflicts of interest via email, which you then track and enter into a spreadsheet
- | You just took over the role and you are not sure where the conflicts were documented– so you need to ask again
- | No one is clear about who can signoff on a conflict, and who has to know about it

This application helps you to:

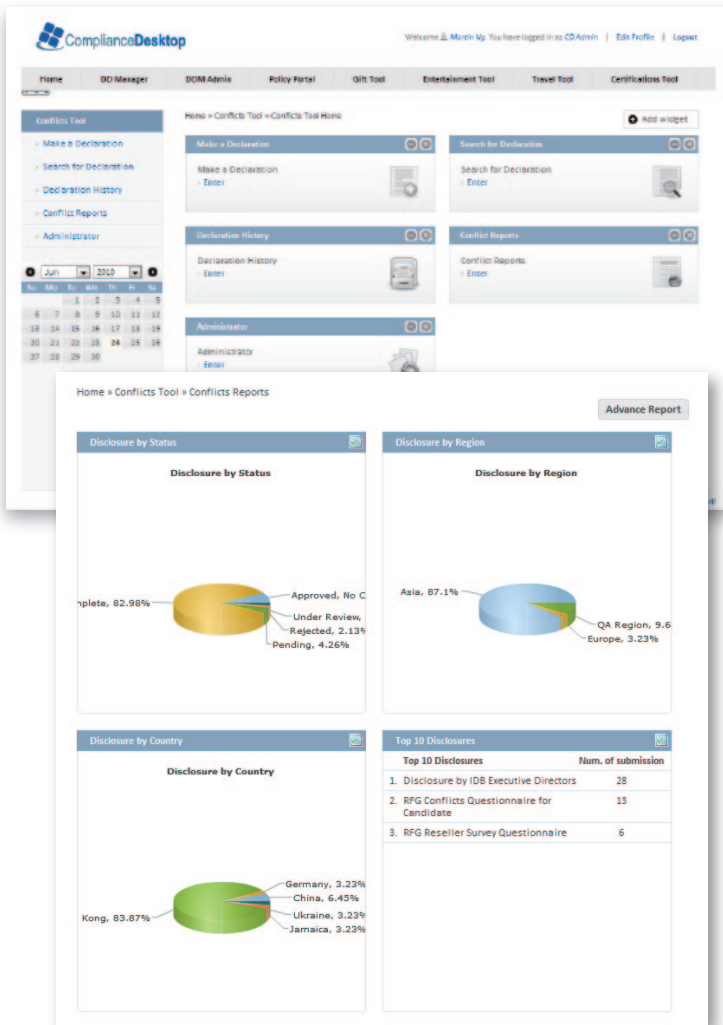

- | Manage large numbers of users – issue reminders, follow-ups and escalations
- | Track answers and check against previous results
- | Ensure signoff and notification cycles are adhered to

How it works

Conflicts of interest could come from anywhere. Ask both your staff and partners about potential conflicts, track them, and inform the people who need to know.

See the Conflicts Tool

Features & benefits

Features

- | Configurable questionnaire form
- | Configurable and dynamic flow of questions
- | Configurable approval workflow
- | Configurable search functions
- | Powerful and flexible reporting
- | Email interaction for updates and task notifications

Benefits

- | Reduce the time taken to rollout conflict of interest questionnaires to your staff, and track the results
- | Allow you to interact with your staff from within the Tool to better understand and document any declared conflicts

ComplianceDesktop® Technology Platform integration

- | Policy Portal - Links to conflicts of interest policies, ethics policies, codes of conduct and training

'I wanted an online, web based, trackable and reportable system with a workflow solution for escalations. The Conflicts Tool gave me all of that reducing my time and allowing me to interact with my staff.'
